

What is claimed is:

- 537
1. A ceramic infrared sensor, having a lens body, comprising ceramic, a supporting part, which supports said lens body, and a detection part, which detects the light that has been transmitted through said lens body, and wherein a pigment that shields visible light is contained in said lens body.
 2. A ceramic infrared sensor, having a lens body, which is comprised of a ceramic part and a resin layer that covers at least the light receiving surface of the ceramic part, a supporting part, which supports said lens body, and a detection part, which detects the light that has been transmitted through said lens body, and wherein a pigment that shields visible light is contained in the ceramic part and/or resin layer of said lens body.
 - X 3. A ceramic infrared sensor as set forth in claim 1 or 2, wherein the linear transmittance of light of 8 to 12 μ m wavelength of said lens body is 50% or more.
 - 15 4. A ceramic infrared sensor as set forth in claim 3, wherein the main component of said ceramic is zinc sulfide (ZnS).
 - X 5. A ceramic infrared sensor as set forth in claim 1 or 2, wherein the linear transmittance of light of 3 to 5 μ m wavelength of said lens body is 50% or more.
 6. A ceramic infrared sensor as set forth in claim 5, wherein the main component of said ceramic is spinel (MgAl_2O_4).
 - 20 7. A ceramic infrared sensor as set forth in ^{claim 1} ~~any of claims 1 through 6~~, wherein said supporting part is comprised of resin.
 8. A ceramic infrared sensor as set forth in claim 7, wherein said

supporting part is made integral with said resin layer.

*B7
CMT*
A 9. A ceramic infrared sensor as set forth in ^{claim 1} any of claims ~~1 through 6~~,
wherein said supporting part is comprised of metal.

A 10. A ceramic infrared sensor as set forth in ^{claim 2} any of claims ~~2 through 9~~,
5 wherein the main component of said resin layer is polyethylene.

11. A ceramic infrared sensor as set forth in claim 10, wherein said
polyethylene is high-density polyethylene.

X 12. A ceramic infrared sensor as set forth in ^{claim 1} any of claims ~~1 through 11~~,
wherein said supporting part includes a cylindrical part, which is formed
10 between the portion of said lens body that transmits light and said detection
part.
